Github.com/codedre | (301) 412 - 2945 | andre@codedre.com | www.codedre.com

I am an engineer all about quality and excellence. A natural leader, dependable team player and burger fanatic who codes functional products that evoke excitement for shareholders. I enjoy using my skills to help people achieve their goals and always put the team's needs ahead my own.

FULL-STACK DEVELOPER

GENERAL ASSEMBLY, WASHINGTON, DC
OCT, 2015 TO JAN, 2016

Full-stack web development program focused on common best practices in object-oriented programming, MVC frameworks, data modeling, and test-driven development.

PROJECTS

- **McDonald's:** Built a memory game that features McDonald's menu offerings and allows users to win redeemable coupons. (HTML, CSS, JavaScript, JQuery)
- **Moodie:** Developed an app that curates nearby food options based on the mood of the user. (Yelp API, Ruby on Rails, SASS, jQuery, Bootstrap, Heroku)
- **Beacon:** Developed a web app that allows users to find and contact like minded travelers based on location and interest. (Express.js, Node.js, MongoDB, Mongoose, Bootstrap, TypeKit, Handlebars, Passport.js, Heroku, jQuery, HTML, CSS)
